1150-1200 Open to Log-in Zoom

1200-1235 Sharing

1235-1245 Q&A

From 2 weeks to 24 hours: Achieving HR Autonomy Through AI-Driven Automation

AI in Corporate

Accelerating Strategic Agility via AI Autonomy Traditional employee engagement cycles (e.g., House Checks) are often slowed by cross-departmental dependencies and manual processes, typically taking two weeks. We show how automated AI workflows compress the full lifecycle—from drafting to data synthesis—into a single business day, allowing HR to move at the speed of the business without IT dependency.

We are honored to feature **Ken Huang**, Seasoned HRBP and Former HR Director in Web 3 industry, who will share firsthand insights into the current state of AI adoption within a major corporate environment.

This 45-minute masterclass shares a real-world success story: how one HR team replaced a 14-day manual survey process with a fully autonomous 24-hour AI workflow—designing, deploying, and analyzing a complete "House Check" in just one day. 45-minute session will move beyond theoretical discussions to explore the real-world implications of AI on human roles and organizational culture.

Co-organizers:

HK People Management Association <https://www.hkpma.net>
