- To listen to the views and comments on the proposed design of the eMPF Platform UXUI

Online Registration

Deadline for enrolment on 27 June 2022
Logon detail will be sent on 28 June 2022

Through the adoption of new technologies and future-proof innovative solutions, the eMPF Platform is a common electronic platform aimed to **standardize**, **streamline**, and **automate** the current MPF scheme administration processes, which is anticipated to bring tremendous benefits to scheme members, employers, and self-employed persons (SEPs) in terms of enhanced user experience in managing MPF, increased efficiency in scheme administration and handling of employees' monthly MPF contributions. Moreover, upon the launch of the Platform, scheme members would enjoy cost savings through the highly digitalized, one-stop single Platform.

In order to perfect the design of the front-end portal, which is an essential component of the eMPF Platform, the MPFA is now conducting an extensive Stakeholders Consultation Exercise (SCE) to reaching out to key stakeholder groups along the MPF value chain to gauge their views and comments on the portal design so that the eMPF Platform can cater for the needs of different users.
